Please read label/leaflet instruction carefully before use

ACTIVE INGREDIENT

Diflubenzuron 2% Gr.

RECOMMENDED USES

Barcelo granules are used for control of mosquito larvae in water bodies like cesspits, drains, disused wells and pools.

MODE OF ACTION

Barcelo granules is an insect growth regulator which interferes with formation of chitin during the moulting process of the insect larvae.

FEATURES AND BENEFITS

- // Easy and Ready to use
- // Effervescent granules which get readily mixed in water
- // Effective against all the three species of mosquito larvae i.e. Aedes, Anopheles and Culex
- // Target specific – Comparatively safe to Non-Target Organisms
- // Granules can also be mixed with water and sprayed
- // WHOPES evaluated and specification available - WHO specification 339/GR (February 2006)

DOSAGE

Habitat	Formulation (kg/ha)
Clear water	1.25 - 3.0

The Acceptable Daily Intake (ADI) determined by FAO/WHO is 0.02 mg/ kg of body weight
