

# Solfac<sup>®</sup>

EW 050

## The Ultimate Solution For Multi-Location Application

- // For Mosquitoes, Cockroach & Houseflies management
- // Quick knockdown effect
- // Odourless
- // HACCP Certified

## ACTIVE INGREDIENT

Cyfluthrin 5% EW

## RECOMMENDED USES

Solfac EW 50 is ideally suited for the control of cockroaches, houseflies and mosquitoes in houses. It can also be used for the bed net impregnation for the control of adult mosquitoes to prevent malaria.

## MODE OF ACTION

It is contact insecticide that affects sodium (Na+) balance inside the nerve cell.

## FEATURES AND BENEFITS

- // Mixes easily and has little or no smell, suitable particularly where sanitation issues are critical
- // Lack of odour and virtually invisible spray residues on the treated surfaces
- // Ideal product for management of malaria vectors (*e.g. Anopheles mosquito*)
- // Active ingredient has a good sticking property and hence adheres on the treated surfaces for a longer time
- // Certified with BIS ISI Mark
- // HACCP Certified
- // WHOPES evaluated

## DOSAGE

### For residual spraying in houses:

Mix 8 ml of Solfac EW in 1 l of water and spray evenly on 20 ml surface at a rate of 50 ml of spray solution per square meter. Ensure good coverage of hideouts like cracks, crevices and corners.

### For bed net impregnation:

Calculate the bed net area and dilute 1 ml of formulation per sq. mt. of the calculated bed net area. For instance, if the bed net area is 10 sq. mt. then dilute 10 ml of Solfac EW or if the bed net area is 20 sq. mt. then dilute 20 ml of Solfac EW in the required quantity of water. Dip the bed net in the diluted solution and later dry the net in shade.

## ANTIDOTE

If swallowed, gastric lavage with warm water may be given, followed by administration of mixture containing 2 parts of activated charcoal, 1 part of magnesium oxide and 1 part of tannic acid in a glass of warm water. Treat symptomatically

**PACKS: 100 ml, 1 l**
